

Goliya Raghavendra Rao

Cloud Infrastructure Engineer | AWS & Multi-Cloud, Networking & Virtualization

Hyderabad, India | +91 9575000663 | rao.gr@outlook.com

LinkedIn: <https://www.linkedin.com/in/graghavendrarao/>

Professional Summary

Cloud Infrastructure Engineer with 17 years of IT experience, including 10 years across AWS, Azure, and GCP. Specialize in cloud networking, hybrid cloud integration, Terraform automation, and VMware virtualization. Proven ability to deliver enterprise-scale cloud migrations, multi-cloud governance models, Infrastructure-as-Code frameworks, and secure architectures across regulated environments. Experienced in AWS security, enterprise compliance (ISO 27001, PCI DSS, SOC2), high-availability systems, and CI/CD automation. Focused on performance optimization, cloud security, and operational efficiency across enterprise and government workloads.

Key Achievements

- Delivered highly scalable AWS architectures and hybrid cloud solutions that improved system availability by 30% and reduced infrastructure costs by 20%.
- Migrated 50+ applications to AWS with 99.9% uptime, leveraging the AWS Well-Architected Framework to boost performance by 25% and reduce security vulnerabilities by 40%.
- Developed and standardized reusable Terraform modules to automate provisioning of AWS networking, computing, and security services, reducing manual effort by 40%.
- Integrated Terraform and CloudFormation workflows into GitHub/GitLab CI/CD pipelines, achieving a 30% decrease in deployment time and significantly improving consistency across environments.
- Consolidated three on-premises datacenters into a streamlined hybrid cloud model, decreasing OPEX by 25% and increasing overall system availability by 30%.
- Optimized global content delivery by configuring Amazon CloudFront and Cloudflare solutions, strengthening DDoS resilience and reducing origin load.
- Implemented robust AWS security controls aligned with ISO27001, PCIDSS, and SOC2 standards, resulting in a 30% reduction in security incidents and consistently strong audit outcomes.
- Enhanced IAM, GuardDuty, Security Hub, and CloudTrail configurations to reinforce identity, logging, and monitoring across multi-account AWS environments.
- Designed and operationalized AWS-based BCP/DR frameworks that reduced recovery time from 4 hours to under 30 minutes while maintaining 99.9% uptime during failover events.
- Built and enforced multi-account AWS governance using Control Tower, SCPs, GuardDuty, and Config, improving compliance adherence by 35% across enterprise workloads.
- Designed enterprise-wide Infrastructure-as-Code frameworks using Terraform and GitOps practices, increasing deployment consistency by 45% and reducing manual config errors.

Core Skills

- **Cloud Platforms:** AWS (primary), Azure, GCP, VMware, On-premises Datacenters
- **AWS Services:** EC2, EKS, CloudFront, ELB/ALB, WAF, Shield, RDS, DynamoDB, S3, KMS, CloudTrail, SNS, SQS, AWS Networking (VPC, TGW, Cloud WAN, VPN, Direct Connect, PrivateLink, Hybrid Networking), DNS (Route 53)
- **Security & Compliance:** IAM, GuardDuty, Security Hub, AWS Organizations, Control Tower, Config, WAF, and ISO 27001, PCI DSS, SOC2
- **Monitoring and observation using** New Relic, CloudWatch
- **DevOps and Automation:** Terraform, GitHub/GitLab CI/CD, CodeBuild/CodeDeploy
- **Virtualization & Infrastructure:** VMware vCenter, VMware NSX-T, ESXi, vSAN, Nutanix, HPE SimpliVity, NetApp ONTAP, Hitachi SAN/NAS
- **ITSM & Delivery:** ServiceNow (Incident/Problem/Change), JIRA, Confluence

Professional Experience

Infosys Limited

Cloud Platform Engineer – XERO, Australia | Sep 2024 – Present

- Engineered AWS networking infrastructure including VPCs, Transit Gateway, VPC Peering, VPNs, PrivateLink, and Cloud WAN to deliver scalable, secure, and compliant connectivity.
- Managed Route 53 DNS operations (hosted zones, routing policies, health checks) ensuring 99.99% availability and optimized DNS performance.
- Automated AWS network provisioning with Terraform, implementing GitHub version control to enhance consistency, auditability, and environment stability.
- Developed standardized Terraform modules for networking and DNS, reducing configuration drift and improving module reusability across environments.
- Improved operational efficiency by resolving complex networking/DNS issues and collaborating with DevOps teams, achieving a 30% reduction in MTTR.

Cloud Lead – BHP, Australia | Jan 2023 – Aug 2024

- Led a team of 18 Cloud Engineers delivering AWS and Azure operations under a cloud-first strategy, driving service reliability and operational excellence.
- Automated AWS account and Azure subscription lifecycle management using Terraform and GitLab CI/CD, achieving 70% faster deployments and 50% fewer configuration errors.
- Resolved complex AWS/Azure incidents via ServiceNow and implemented continuous improvement tracking in JIRA while maintaining KBs and SOPs in Confluence to standardize operations.
- Architected and deployed advanced AWS networking solutions, including Transit Gateway (TGW), multi-VPC architectures, VPN setups, and scalable routing patterns.
- Led cloud vulnerability remediation programs, delivering security posture reports and ensuring compliance with organizational and cloud governance standards.
- Directed daily cloud operations and prioritization across AWS and Azure platforms, ensuring consistent SLAs and improving cross-team coordination, issue resolution quality, and operational maturity.

Senior Technology Specialist – Infosys IT Services | Apr 2013 – Dec 2022

- Architected and deployed hybrid cloud and on-prem datacenter environments across AWS, Azure, SaaS platforms to achieve scalable, secure, and cost-efficient infrastructure services.
- Implemented AWS Landing Zone with multi-account governance, GuardDuty, Config, and SCPs, strengthening compliance, security posture, and operational governance.
- Delivered high-availability AWS infrastructure including EKS, EC2, VPC, Transit Gateway, Route 53, WAF, CloudFront, and S3 to support resilient, production-grade cloud workloads.
- Developed and evaluated multi-cloud PoCs across AWS, Azure, and GCP, accelerating solution adoption and lowering infrastructure costs through optimized architectural patterns.
- Administered VMware and enterprise storage platforms to maintain high availability, continuity, and platform stability.

Mather+Platt Pumps Ltd (WILO), India

Senior Executive – ARTEC | Oct 2007 – Mar 2013

- Provisioned servers, Dell workstations, and HPC compute systems to support R&D simulation workloads and high-performance computing operations.
- Administered Cisco routers and switches, implementing ACLs, VLANs, inter-VLAN routing, and security hardening to ensure stable and secure network infrastructure.
- Operated Active Directory, DNS, and domain controllers, and implemented enterprise routing protocols with backup and failover processes to enhance reliability and continuity.

Silicon Dot Com Technologies, India

Software Engineer | Oct 2005 – Aug 2007

- Developed embedded system firmware for NEC, Motorola, and Microchip microcontrollers using C and Assembly.
- Built prototypes, executed validation tests, and collaborated with cross-functional teams through the lifecycle.

Education

Bachelor of Engineering (Electronics & Telecommunications)

Pt. Ravishankar Shukla University, India | 2001 – 2005

Certifications

- **AWS:** Solutions Architect Professional, DevOps Engineer Professional, Advanced Networking Specialty, Security Specialty, Solutions Architect – Associate, Developer – Associate
- **Microsoft Azure:** AZ-104 Administrator Associate, AZ-500 Security Engineer, AZ-700 Network Engineer, AZ-305 Solutions Architect
- **Google Cloud:** Professional Cloud Architect, Associate Cloud Engineer
- **HashiCorp:** Terraform Associate (003)

Personal Information

Languages: English, Hindi

Work Authorization: Australia TSS 482 (valid to Feb 2027)
